

ENERGY NOTES

Get more than a bird's eye view of your energy use

It's easy to overlook some energy savings opportunities within your business, particularly if you've already taken steps to reduce your usage. That's where we can help.

With an FPL Business Energy Evaluation, you can find ways to change the current way you use energy and lower operating costs by making your bill even lower. When you schedule an on-site evaluation for your business, one of our FPL energy experts will audit your energy use and provide a customized report with energy-saving solutions tailored to your specific energy needs. By making the recommended changes, you could save up to \$500 a year in energy costs.

Visit www.FPL.com/PetProject to sign up for a free Business Energy Evaluation.

CHANGING THE CURRENT. FPL

Want to change the current way you fuel your fleet?

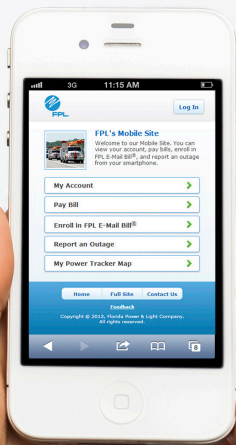

Across America and here in Florida, folks will be celebrating National Plug In Day Sept. 28 – 29. We'll be right there with them at locally planned events raising awareness about electric vehicles and the benefits of "plugging in" versus "filling up" for your business and employees. Visit www.FPL.com/EVresources to learn about a celebration near you.

If you're interested in changing the current way you fuel your company's fleet, you'll also be able to check out different electric vehicles on the market and calculate how much you could save by converting your fleet. Here at FPL, we already have one of the greenest fleets in the nation and we're committed to helping others achieve the same. Plug-in electric vehicles can help your business save, while cutting our state's dependence on foreign oil and protecting the environment.

Get in the know if you're in the dark

Ever find yourself in the dark and not sure why? Providing reliable service to you is our top priority every day. But when service is interrupted, you can report the outage, find out why your lights are out or learn when they'll be back on straight from any mobile device. Bookmark www.FPL.com on your smartphone today and be prepared the next time you need answers about a power outage.

Storm charge decrease

You will see a slight reduction in the storm charge portion of your bill as part of a routine adjustment effective this month. The charge, a portion of your bill that helps pay for previous hurricane restoration costs and helps to build the reserve for future storms, adjusts periodically throughout the year following Florida Public Service Commission approval. The storm charge effective Sept. 1 is \$1.44 per 1,500 kWh for small, non-demand business customers. To view information for your specific rate class, visit www.FPL.com/rates.

Call 811 before you dig

Planning construction or other work around your business? If it involves digging, don't forget to call 811. Florida law requires that you call 811 to have buried utilities located before digging starts. This free service helps

keep everyone safe. Please call at least two business days in advance.

Visit www.FPL.com/safety to learn more ways to stay safe around electricity

FPL President Eric Silagy takes you inside the FPL Storm Command Center

Faster storm recovery for your business

All businesses need a storm plan. For us, that means having the right tools and resources to respond quickly following a storm. FPL President Eric Silagy invites you to get an inside look at how we restore power faster. Visit www.FPLblog.com/inside to see how we prioritize our restoration work following storm-related outages. You'll also see how our very own meteorologist helps us pinpoint when and where crews will be needed. It's all to ensure we get businesses running again as soon as possible.

One million poles strong and counting

We're always working to make sure the power poles that bring electricity to your business are strong. In fact, our specialized crews just inspected their one-millionth pole. If laid end-to-end, that's enough poles to reach from here to Seattle and back!

While we're continually installing cutting-edge technology to improve your electric service, these poles remain a key part of our system. If a pole doesn't meet our strength standards, we upgrade or replace it as part of our ongoing commitment to ensuring reliable service for your business. Visit www.FPL.com/reliability to see how we inspect 500 poles every business day to keep your service strong.
