FOR YOUR HOME & FAMILY

Creating an energy independent tomorrow

Just like you, we believe electricity should be affordable, reliable and free from foreign oil dependency. That's why we're replacing older, inefficient power plants with new ones like the Riviera Beach Next Generation Clean Energy Center. It began powering homes and businesses across Florida this month using cleaner, low-cost American natural gas.

Our efforts are working. Already, we've reduced foreign oil use by more than 98 percent, while your electric bills remain the lowest in the state. Learn more about how this investment will change Florida's energy today and make the air you breathe even cleaner: [» FPL.com/Riviera](http://FPL.com/Riviera)

You still have the lowest bill in the state

Fuel savings from the advanced efficiency of our newest, clean energy center will help reduce the cost for customers. As part of a rate agreement approved by the Florida Public Service Commission in 2012, a typical monthly bill will increase \$1.23, or about 4 cents a day, beginning in April. Bill comparison*

National Average	\$131.98
Florida Average	\$122.24
FPL Bill - April 2014	\$101.71

* Bill comparison based on typical 1,000-kWh residential customer total bill. FPL bill amount is effective April 2014. Florida average is the average of January through December 2013, and national average is as of July 2013. Learn more: FPL.com/lowbill

Tools to help you save

We offer several programs that can help you save energy and money. Here are just a few of those services, which are available to you by visiting FPL.com/inhome or calling 1-800-DIAL-FPL (1-800-342-5375):

- » **Walk-through audit:** In this free evaluation, our energy expert will visit your home, identifying energy-saving opportunities and rebates available to improve your home's energy efficiency.
- » **Computer-assisted audit:** In a more detailed evaluation costing \$15, we'll also estimate potential savings, installation costs and the payback period of each recommendation.

A Building Energy Rating System survey is also available. It rates your home according to the current Florida energy-efficiency code requirements for new home construction and may help you qualify for improved mortgage options or increase your home's resale value. New or existing homes can apply for a Class 1 or 2 rating survey, which involves an on-site inspection. The cost for homes up to 2,000 square feet* is \$480, or \$555 with an air-conditioning duct leakage test, which includes one handler. Add \$35 for each additional handler. At a cost of \$75, the Class 3 rating option is for new construction only and is based on site plans and construction documents.

*Note: For Class 1 and 2 surveys, there is an additional charge of 8 cents per square foot for homes greater than 2,000 square feet, or 3 cents per square foot for a Class 3 survey.

Ask the Energy Expert

Q What saves the most money? Putting my computer in sleep mode or turning it off and on when I need it?

- Anastasia R. from Venice, Fla.

A We recommend turning off your computer when not using it for the greatest savings. Learn more from our experts:

Did you know?

You can help prevent a leading cause of power flickers and outages just by planting trees in the right spot, far away from power lines.

Also, we'll plant a tree for every person who enrolls in FPL E-mail Bill® this April. Learn more:
