FOR YOUR HOME & FAMILY

Just click for a chance to win

It's easy to save up to \$250 per year on your energy bill with FPL's Online Home Energy Survey. Now, just click to complete the survey by Sept. 30 and you'll be automatically entered to win a \$5,000 home energy makeover for upgrades, such as ENERGY STAR® appliances, a central air conditioning system and ceiling insulation.

Just click to change the current way you use energy and make your bill even lower. Let us help you get started:

Making your service more reliable with technology

What if you could prevent a problem before it happened? New cutting-edge technology is helping us do that with your electricity. We continue to strengthen the electric system with smart technology that can reroute power around trouble spots, limiting the number of customers affected by a power outage. It also helps us repair the problem and get your lights back on faster. See how this is making your service even more reliable:

Ask the Energy Expert

Q Which A/C fan setting costs more, “on” or “auto?” My friend believes the auto setting uses more electricity.

- Beverly H. from Weston

A The on/auto switch on your A/C thermostat can affect the price you pay to cool your home. We recommend always keeping it set to “auto.” Find out why:

Did you know about 2-1-1?

There is a free community resource available at your fingertips 24/7. By dialing 2-1-1, you can get answers to your questions and help get connected to available community programs for food, housing, employment, health care, crisis counseling and more.

Pay on time, automatically

With FPL Automatic Bill Pay[®], you'll never have to remember to pay your bill again. Enroll today: » FPL.com/autopay

Storm charge adjustment

You will see a decrease in the storm charge portion of your bill as part of a routine adjustment effective this month. This charge, which helps pay for previous hurricane restoration costs, is adjusted periodically during the year following Florida Public Service Commission review and approval. The storm charge, effective Sept. 2, will be \$1.16 per 1,000 kWh for residential customers. View information about your rates:

Generator tips for storm season

If a portable generator is part of your storm plan, stay safe by always:

- » Following the manufacturer's operating instructions.
- » Running it outside, away from open windows.
- » Plugging appliances into it - never connecting it directly to your home's wiring.
