

# EnergyNotes

FOR YOUR BUSINESS

## Creating an energy independent tomorrow

Just like you, we believe electricity should be affordable, reliable and free from foreign oil dependency. That's why we're replacing older, inefficient power plants with new ones like the Riviera Beach Next Generation Clean Energy Center. It began powering homes and businesses across Florida this month using cleaner, low-cost American natural gas.

Our efforts are working. Already, we've reduced foreign oil use by more than 98 percent, while keeping business rates low. Learn more about how this investment will change Florida's energy today and make the air you breathe even cleaner: [» FPL.com/Riviera](http://FPL.com/Riviera)

## Keeping business rates low

Fuel savings from the advanced efficiency of our newest, clean energy center will help reduce the cost for customers. As part of a rate agreement approved by the Florida Public Service Commission in 2012, most business customers will see a net increase of less than 1 percent beginning in April. Learn more:

### Small business bill comparison\*

National Average	\$194.79
Florida Average	\$192.86
<b>FPL Bill - April 2014</b>	<b>\$157.44</b>

\*Bill comparison is based on typical total bill of 1,500-kWh GS-1 rate class, representing a majority of FPL business customers. FPL bill amount is effective April 2014. The Florida average is the average of January through December 2013 and national is as of July 2013. Learn more: [FPL.com/lowbusinessbill](http://FPL.com/lowbusinessbill)

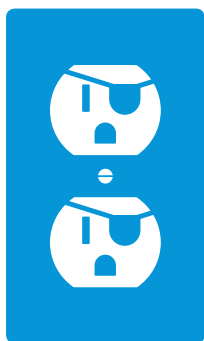

## Replacing a company car? Start your research with us

We know savings matters to your business. Converting your company cars to plug-in electric vehicles can help you:

- » Save 80 percent on fuel compared to gasoline
- » Access HOV lanes and “refuel” onsite
- » Choose from various light-duty to heavy-duty vehicles

We have the resources you need to start making a business case for changing the current way you drive: [» FPL.com/electricvehicles](http://FPL.com/electricvehicles)

Roughly  
**\$6 billion**  
of electricity is  
**pirated**  
each year  
in the U.S.

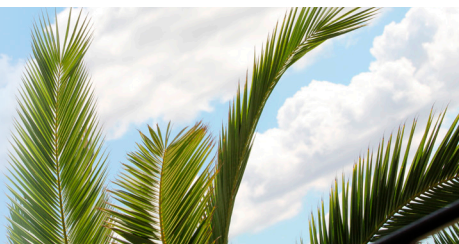

Learn how you're paying for this crime and how to report it:

[» FPL.com/meters](http://FPL.com/meters)

## Did you know?

You can help prevent outages and stay safe by ensuring trees are far away from power lines. We can help you make informed landscaping decisions:

## Ask the Energy Expert

**Q** What saves the most money? Putting my computer in sleep mode or turning it off and on when I need it?

- Anastasia R. from Venice, Fla.

**A** Whether it's at your business or just the computer in your home office, we recommend turning off computers when not in use for the greatest savings. Learn more from our experts:

## Save a tree, plant a tree

We're doing our part, and you can, too. For every E-Mail Bill® enrollment in April, we'll partner with the Arbor Day Foundation to plant a tree on your behalf. Help us celebrate Arbor Day this month by enrolling in our free paperless billing program:
