

# EnergyNotes

FOR YOUR BUSINESS

“The energy dashboard will empower both private and public sector entities.”

Alberto Carvalho  
Miami-Dade Superintendent of Schools

## New tool helps businesses find ways to save

Principal Benny Valdes, Miami Senior High School

Miami-Dade Superintendent of Schools Alberto Carvalho issued a challenge to his school principals – find new ways to save energy and money. Principal Benny Valdes and others can now do that with the help of their school’s own online Energy Dashboard.

Miami-Dade County Public Schools and thousands of other businesses across Florida with activated smart meters now have access to this online tool that allows them to see energy use down to the hour, budget and forecast for the future, and make informed energy decisions. By the end of 2015, most businesses will have access to this free, helpful resource from FPL. Learn more about the Energy Dashboard: [» FPL.com/bizdashboard](http://FPL.com/bizdashboard)

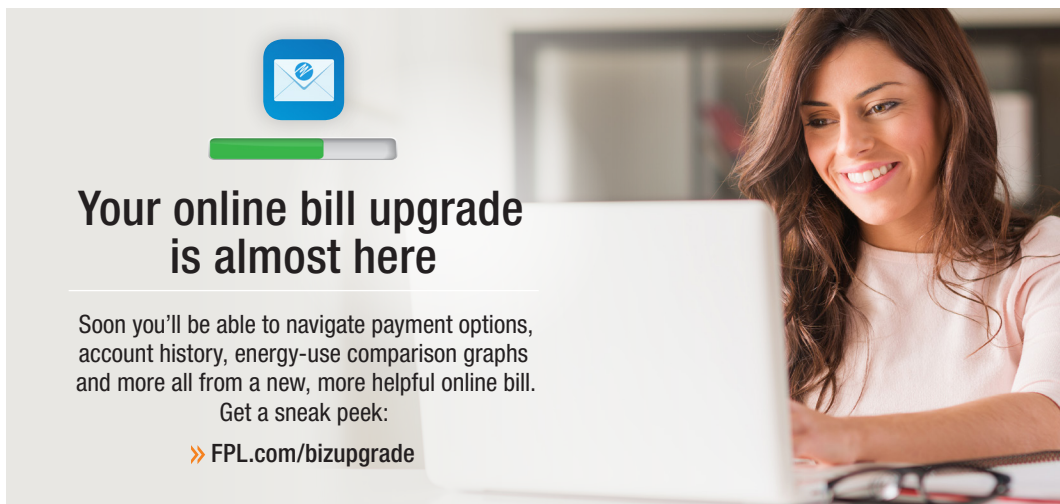

## Your online bill upgrade is almost here

Soon you’ll be able to navigate payment options, account history, energy-use comparison graphs and more all from a new, more helpful online bill.

Get a sneak peek:

## Competitive rates spurring economic growth

It's another success for Florida. Cheney Brothers, Inc., one of the largest food-service distributors in the Southeastern U.S., recently broke ground on a new \$100 million distribution center in Charlotte County that will create 300 jobs. "Florida has an attractive business climate, and FPL's low electric rates certainly are an important factor," said Bill Foley, the company's president. Learn more about how we're helping new and expanding businesses create jobs for Floridians, and find resources that may help you: [» PoweringFlorida.com](http://PoweringFlorida.com)

### Do you have one of these conferences or trade shows on your calendar?

Stop by to see us at our FPL booth and learn ways to save energy and money for your business.

- » Florida Association of Counties: Orlando, June 17 – 20
- » Florida Health Care Association: Orlando, July 8 – 9
- » Florida Educational Facilities Planners' Assoc.: Boca Raton, July 8 – 11

Or, we can come to you! Just schedule a free energy evaluation at your business with one of our energy experts: [» FPL.com/BEE](http://FPL.com/BEE)

### Ask the Energy Expert

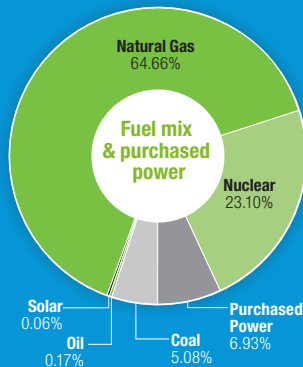

**Q** We'd love to make our bill even lower. Can you help?

- Cindy from Oakland Park

**A** There are a number of things you can do, but probably the easiest is to enroll in our On Call® program. Get money back on your electric bill just by allowing us to occasionally turn off your A/C remotely for short periods of time when the demand for energy is highest. Read more:

[» FPL.com/bizenergyanswers](http://FPL.com/bizenergyanswers)

### Did you know?

We use mostly American-produced clean fuel sources to generate the electricity you use to power your business.

*Sources of electricity generation for the 12 months that ended on Feb. 28, 2014*

## We offer a choice of meter

Smart meters provide important customer benefits, and that's why they're becoming the standard meter for FPL customers. However, eligible customers who prefer not to have the smart meter can choose to use a non-standard meter (the older technology replaced by the smart meter). Through a new tariff\*, customers must pay an enrollment fee of \$95 and a monthly surcharge of \$13 to cover the cost of the non-standard service. Learn more: [» FPL.com/meteroption](http://FPL.com/meteroption)

*\*The tariff has been approved but is under review by the Florida Public Service Commission.*
