Lower bills, higher reliability

Just like you, we believe electricity should be affordable, reliable and clean. That's why we're replacing older, inefficient power plants with new ones like the FPL Port Everglades Next Generation Clean Energy Center, which is scheduled to open next month.

Our smart investments in new modern power plants like Port Everglades, which are more than 90 percent cleaner and 35 percent more efficient, are paying off. The fact that they run using less fuel, and that natural gas prices are even lower, allows us to reduce your electric bill in April for the fourth time in the last 16 months. And, this fuel rate reduction more than offsets the base rate adjustment that takes effect when Port Everglades begins serving customers – part of a four-year rate agreement approved in 2012.

Beginning in April, typical business customer bills will decrease in the range of approximately 2 to 7 percent compared with current rates, depending on rate class and type of service.

We're changing Florida's energy today to create a better tomorrow for all of us. See how we're working to keep your business bills low:

Reliability up 25 percent

We know how important it is to have reliable electricity to power your business. We're strengthening power poles and investing in advanced, smart grid technology that has helped improve reliability by about 25 percent in the past five years. But, we're never satisfied. We're always working to make the grid even stronger and smarter to deliver more reliable service.

Allapattah community receives energy savings

At FPL, we're always working to provide electricity you can count on at the lowest cost, while helping you find ways to make your bill even lower.

We recently partnered with the Allapattah community in Miami to find potential savings for its Juan Pablo Duarte Park.

Sign up for a Business Energy Evaluation and find out how your business can save up to \$500 a year.

Stop thieves from driving up your bill

Did you know? Electricity is the third most stolen product in the U.S. Stealing electricity is a felony and can lead to more than 20 years behind bars. Learn how you're paying for this crime and how to report it:

Advancing affordable clean energy

We're tripling our solar capacity this year by building new solar power plants. It's part of our commitment to generating clean energy affordably and reliably, now and in the future for our customers.

Storm charge adjustment

A routine adjustment to the storm charge portion of your bill takes effect this month. Adjusted up and down periodically during the year with Florida Public Service Commission approval, this charge helps pay for previous hurricane restoration costs and replenish the reserve for future storms. Effective March 1, the storm charge rate will change to \$1.80 per 1,500 kWh for small, non-demand business customers.
